DETAILED ACTION

Ex Parte Quayle

This application is in condition for allowance except for the following formal matters:

Priority

Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence(s) of the specification or in an application data sheet by identifying the prior application by application number (37 CFR 1.78(a)(2) and (a)(5)). If the prior application is a non-provisional application, the specific reference must also include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

The status of US application 09/875,392 listed in the cross reference is incorrect. The US application '392 is now US Patent No. 6,783,979.

Appropriate correction is required.

Specification

The disclosure is objected to because of the following informalities: The term "Figure 10A-G" on page 9, line 18 is incorrect because there is a drawing labeled Fig. 10H and the term is missing. Suggest replacing the term with -- Figure 10A-H --.

Appropriate correction is required.

Claim Objections

Claims 9 and 11 are objected to under 37 CFR 1.75 as being a substantial duplicate of claim 1. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim 1 already recites the limitation of claim 9 (a nucleic acid encodes a HCN channel) and claim 11 (a nucleic acid encoding a MiRP1).

Claims 36-38 are objected to because they depend on claim 9.

Claims 39-41 are objected to under 37 CFR 1.75 as being a substantial duplicate of claims 36-38. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claims 36-38 already recite, by depending from claim 1, the limitation of claims 39-41 (a nucleic acid encoding MiRP1).

Allowable Subject Matter

Claims 1, 2, and 32-35 are allowed because the claims are free of the prior art of record.
